Professional Summary

Passionate Full-Stack Developer specializing in the MERN stack (MongoDB, Express.js, React, Node.js). Experienced in building responsive and scalable web applications with clean and maintainable code. Strong knowledge of RESTful API development, database integration, and modern frontend development practices. Focused on improving application performance, creating user-friendly interfaces, and writing efficient code. Quick learner and dedicated to building reliable and high-quality web solutions.

Skills

Frontend: JavaScript, HTML, CSS, React.js

Backend: Node.js, Express.js, MongoDB

Tools & Version Control: Git, GitHub

Deployment & Hosting: Render, Netlify

Experience

MERN Stack Intern **Nov 2025 – Feb 2026**

Webtech Evolution (Work from Office)

- Developed **Shoppzo**, a role-based e-commerce platform providing secure authentication and different access levels for customers, providers, and admin users.
- Built customer features including product browsing, wishlist management, cart with coupon offers, order history, and secure payment processing.
- Designed separate dashboards where admins managed platform data and providers managed their own products coupons, and product combinations.
- Implemented responsive UI, search functionality, profile management, and secure order and discount management for a smooth shopping experience.

Projects

Meal Bridge | *JavaScript* **May 2025 – Oct 2025**

- Developed **Meal Bridge**, a full-stack web application to reduce food waste by connecting food donors with NGOs.
- Enabled donors to post surplus food details and NGOs to search and request food based on location and availability.
- Implemented features like **user authentication, role-based access, and request tracking** for smooth communication.
- Helped support social welfare by creating a platform that reduced food wastage and improved food distribution to the needy.

Certifications

- **JavaScript Workshop Certificate – DIT Interactive Pvt. Ltd. (2023)**
- **Web Development with Node.js, MongoDB and Express – Infosys (2025)**
- **Node.js – Infosys (2025)**
